

Razz Fox

Software Engineer

Razz Fox

Tucson, Arizona

480.779.7299

contact@razzfox.me

Skills

Java, unit testing, MVC design	5 years
Linux, Bash, regex, SSH, PGP	5 years
Agile teamwork, Git collaboration	4 years
HTML5, CSS3, HTTP RESTful API design	4 years
Android app development, debugging	2 years
JavaScript, JQuery, VueJS, OAuth, SSL	1 year
Microsoft Visual Studio, C# / VB / .NET, T-SQL	6 months

Experience

Self-Employed / Android and Web Developer, Linux server administrator
2013 to present, Phoenix and Tucson, Arizona

Creating websites for remote clients and working with remote developers. This spans from image and video editing, to managing a PayPal and Facebook page, to migrating an email server from Microsoft to Google.

Simply Bits / E-commerce .NET and Javascript Web Developer
August through December 2016, Tucson, Arizona

Web development on C# / VB .NET e-commerce sites. Created .NET backend and API for database, VueJS frontend from scratch. Taught Git source control and Git workflow company-wide, and introduced Bash scripting and SSH security.

Amadeus Revenue Integrity / Big Data Intern
May through December 2015, Tucson, Arizona

Created proposal to use a Hadoop cluster to catalog production logs, and made prototype to demonstrate use cases and dispel myths. Scripted configuration of CentOS servers. Cowrote REST API to run Java MapReduce jobs on prototype.

Education

University of Arizona / Bachelor of Science in Information Science
Conferred January 2016, Tucson, Arizona

Computer Science minor. Courses focused on using technology to capture, analyze, and visualize the real world as digital data. Machine learning on large datasets. E.g. Created web app to score intelligence and measure reaction times.
